### **REASON FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

1. Examiner finds applicant's amendment to independents claim 1 and 13 sufficient to overcome the closest relative prior art of, Ishiguro et al. (European Patent Application EP 0856821), Barlow et al. (US Patent No. 2004/0215964) and Deindl et al (US Patent No. 6,076,162). The teachings of Ishiguro, Barlow, and Deindl do not teach nor suggest applicant's newly amended claim limitation element of: "storing a certificates table containing a digest form of at least one public key in a memory in the microcircuit, wherein the public key is inserted into the certificates table by a step that comprises inserting, in the certificates table, a pointer to the digest form of the public key of the certification entity that issued the certificate of the public key, so as to define a certification tree in combination with the inserted digest form of the public key" and the claim limitation elements of "calculating a digest form of the received public key and searching for the calculated digest form of the public key in the microcircuit's certificates table, at a location at which the inserted pointer points".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Accordingly, claims 1, 2, 4-13, 15 and 17-25 are allowed.
